

Sepacore® Flash Cartridges

Speed and efficiency

BUCHI Sepacore® Flash Cartridges are designed to allow fast and efficient isolation of high purity compounds. The very broad range of sorbents together with the large choice of cartridge sizes provides a solution for any purification requirement.

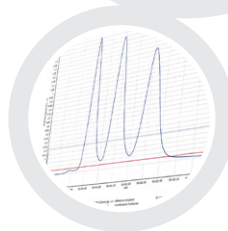

Fast
Optimized purification
even at high flow rate

Efficient
High resolution
separation

Easy to use
Standard format with extensive
choice of sorbents

Flash Cartridges: Your most important benefits

Fast

- Short separation time at high flow rates with minimized back pressure
- Fast optimization on high resolution cartridges
- No column cleaning and filling required

Efficient

- High resolution separation using high quality silica
- Isolation of your compound from a complex mixture
- Reproducible separations on optimally packed cartridges

Easy to use

- Standard Luer-Lock® connection
- Straightforward scale up on cartridge sizes ranging from 4 g up to 1600 g
- No column packing skills required
